Overview

Welcome to your Control Panel, elissa.

This is where you manage your OneID, the devices that access it, your personal information and track your activity.

Here's what's next...

Set up additional security.
Although your information is encrypted at NSA-levels, some people feel better with a password also standing guard. You can set it up here, but it's certainly not required.

Let's tell some friends.

Settings

Adjust OneID to match the way you live, shop, and think about security.

If you share your computer or would like the option to use a password with certain security settings below, feel free to set one. Remember, OneID doesn't require a password so it's entirely up to you.

Scenario 1

First Time User Experience

User on device "a" receives "request for donation email"

a

$5

Request for donation email

step 1

User clicks "donate" link in an email and goes to a form in a browser.

Form fill personal information

step 2

User fills in personal and billing information on form and clicks continue.

Complete

OneID

Confirm and complete donation
+
Remember me with OneID

step 3

Part of the completion process also includes a "Remember me with OneID" option.

Selected by default, the "Remember me with OneID" creates a OneID for the user from the info they added to the form.

Alternately, there are links to learn more about OneID on the page.

Thank you!

Reciept

Thank you!

Thank you for donation email

Welcome to OneID

Welcome to OneID email

Scenario 2

Second+ Experience

User on device "a" receives "request for donation email"

a

$5

Request for donation email

step 1

User clicks "donate" link in an email and goes the "Thank You" page.

Thank you!

Reciept

Thank you!

Thank you for donation email

Scenario 3

User on device "b" or "c" (any new device) receives "request for donation email"

b

c

$5

Request for donation email

step 1

User clicks "donate" link in an email and goes to a form in a browser.

email matching

Invisible to the user, we check to see if their email matches a OneID account.

new user

no

User is directed to Step 2 of Scenario 1

new device

yes

User is instructed to use their "Personal URL" from the OneID Welcome email to add the new device.

Welcome to OneID

Welcome to OneID email

step 2

User clicks their "Personal URL" and adds new device to their OneID account.

User is directed to "Thank You" page.

Thank you!

What is two-step verification?

Two-step verification (sometimes referred to as two-factor authentication) enables you to improve the security of any online transaction by requiring the involvement of a second device.

When a site asks for two-step verification – to transfer money online, for example – we securely send an approval request to the OneID app on your phone. Instantly you will see full details of the request and can approve or reject it right there on your phone.
